

AI OPPORTUNITY REPORT

Marietta HVAC Services | AP-2025-00001

AI OPPORTUNITY SCORE

82/100

High potential for value creation through AI-driven operational improvements

SCORE BREAKDOWN

Technology Debt	85/100	Minimal existing systems create greenfield opportunity
Operational Inefficiency	78/100	Manual scheduling, paper-based processes
Data Readiness	75/100	QuickBooks data available; customer records digitized
Implementation Feasibility	90/100	Small team, motivated transition period

CURRENT OPERATIONS ANALYSIS

Inferred Workflow (Customer to Cash)

- Customer calls → Receptionist answers (or voicemail) → Manual scheduling on whiteboard
- Dispatcher assigns technician → Tech drives to job (no route optimization)
- Tech completes work → Paper invoice → Office enters into QuickBooks → Payment collected

Technology Stack Assessment

Category	Current State	Gap
CRM	None	High
Scheduling	Manual whiteboard	Critical
Dispatch/Routing	Phone calls	Critical
Payments	Check/Card on-site	Medium
Customer Communication	Phone only	High

Inventory	Manual counts	Medium
-----------	---------------	--------

IDENTIFIED AI OPPORTUNITIES

#1: AI Voice Agent for Inbound Calls

RANK 1	Payback: 2 months	Complexity: Low
--------	-------------------	-----------------

Current State: 1 receptionist handles ~50 calls/day. Approximately 20% of calls go to voicemail during peak hours or after 5pm. Customer reviews mention 'hard to schedule' and 'went to voicemail.'

Proposed Solution: Deploy 24/7 AI voice agent (Vapi or Bland AI) to answer inbound calls, schedule appointments, handle common FAQs, and route complex issues to staff.

Investment	Annual Benefit
Implementation: \$8,000 - \$15,000	Revenue Capture: \$54,000
Monthly SaaS: \$300-500/mo	Cost Savings: \$25,000
Training: Included	
Total Year 1: ~\$12,000	Total: \$79,000

#2: AI-Optimized Routing & Dispatch

RANK 2	Payback: 2 months	Complexity: Medium
--------	-------------------	--------------------

Current State: Manual whiteboard scheduling with ~35% windshield time (drive time between jobs). No GPS tracking. Technicians call office for next job.

Proposed Solution: Implement ServiceTitan or Housecall Pro with AI-powered route optimization. GPS fleet tracking. Mobile app for technicians with real-time job updates.

Investment	Annual Benefit
Software: \$3,000-5,000/yr	Additional Jobs/Day: 2.4
Implementation: \$15,000-20,000	Revenue Increase: \$156,000
GPS Hardware: \$2,000	Fuel Savings: \$12,000
Total Year 1: ~\$20,000	Total: \$168,000

TOTAL YEAR 1 VALUE CREATION	\$265,000
-----------------------------	-----------

IMPLEMENTATION ROADMAP

Phase	Timeline	Activities
Phase 1: Foundation	Weeks 1-4	Implement ServiceTitan, migrate customer data, train staff
Phase 2: Voice AI	Weeks 5-8	Deploy AI voice agent, integrate with scheduling, monitor
Phase 3: Optimization	Weeks 9-12	Enable AI routing, install GPS, refine workflows
Phase 4: Scale	Months 4-6	Add AI quoting, predictive inventory, expand capacity
